EDUCATION

University of Houston

Houston, TX

Bachelor of Science, Biotechnology

Jan. 2023 – May 2027

- Coursework: Intro to Biotechnology, Biopython, Microbiology & Lab, Biology I & II, Chemistry I & II
- Organizations: NSBE, Biomedical Engineering Club, Robotics Club

EXPERIENCE

Immatics

Houston, TX

Quality Control Research Associate Assistant

May 2025 – Aug. 2025

- Executed 5+ daily QC assays (plate reader, spectrophotometer, light microscopy) across sterile mammalian cell culture workflows, achieving zero contamination events over 4 weeks.
- Documented assay deviations and protocol troubleshooting in Microsoft Office within same-day turnaround, directly supporting regulatory submission compliance across an active QC pipeline.

Johnson & Johnson MedTech – Forage

Virtual

Digital Surgical Solutions Virtual Simulation

Aug. 2024 – Jan. 2026

- Diagnosed response-time errors in a robotic surgical arm using Python and Excel, pinpointing software root causes and reducing debug cycle time by prioritizing 1 critical control fix.
- Designed 3+ mock surgical components in SolidWorks and mapped robotic workflows, gaining hands-on proficiency in medical device design and digital process modeling.

Chick-fil-A Restaurants (Bella Terra)

Houston, TX

Team Member

Jun. 2023 – Aug. 2024

- Sustained ~98% cash handling accuracy across 500+ transactions per hour; identified bottlenecks and contributed process improvements that measurably reduced customer wait times.
- Trained new team members on POS systems and service protocols; coordinated across stations during high-volume shifts, building adaptability and cross-functional communication under pressure.

PROJECTS & LABORATORY EXPERIENCE

Unknown Bacterial Identification | *Microbiology, Biochemical Assays, Gram Staining*

2024

- Applied 7 biochemical assays (SIM, citrate, MR-VP, urea, carbohydrate fermentation) alongside Gram staining and streak isolation to successfully identify an unknown bacterium as *Klebsiella*.
- Differentiated *Klebsiella* from *Enterobacter* by cross-referencing morphological and biochemical data; troubleshot 2+ contamination and isolation inconsistencies to reach a definitive identification.

Desktop Bioreactor – Gene Therapy Bioprocessing | *Fusion 360, CAD, Design for Manufacturing*

Dec. 2025 – Present

- Designed a compact bioreactor chamber in Fusion 360 — modeling vessel geometry, fluid-handling integration, and component layout — to simulate gene therapy bioprocessing at lab scale.
- Optimized CAD design for 3D-print fabrication, translating manufacturing constraints into a functional prototype concept without access to a machine shop.

CERTIFICATIONS

CITI Program (2026): Biomedical Eng. Responsible Conduct of Research; Biosafety Officer Training; Research Security Training

MathWorks (2026): MATLAB Onramp

TECHNICAL SKILLS

Lab: Mammalian Cell Culture, Aseptic Technique, PCR, Gel Electrophoresis, Light Microscopy, Microbiology Staining, Gram Staining, Serial Dilutions, Pipetting, Plate Reader & Spectrophotometer Assays

CAD & Engineering: SolidWorks, Fusion 360, AutoCAD, Inventor Pro

Programming: Python, MATLAB, Biopython

Tools: Microsoft Office (Excel, Word, PowerPoint), POS Systems

Soft Skills: Technical Documentation, Cross-functional Communication, Team Leadership, Problem Solving

LEADERSHIP & VOLUNTEERING

Rosenberg-Richmond Helping Hand

Rosenberg, TX

Team Leader

– Aug. 2025

- Led a volunteer team supporting 10+ families per cycle in accessing community resources; tracked 100% of cases and follow-up actions in Excel across multiple community partners.
- Developed outreach strategies to promote equitable healthcare access, increasing resource utilization among underserved populations.

Houston Food Bank

Houston, TX

Volunteer

Ongoing

- Sorted, packaged, and distributed food to thousands in need; strengthened logistics and teamwork skills in a fast-paced, high-volume environment.
